MASTERS OF EXCELLENCE AND NEW WORLD THINKING.

Beretta Defense Technologies (BDT) is the strategic alliance of four Beretta Holding Group defense companies: Beretta, Benelli, Sako and Steiner. These BDT founding companies produce the finest weaponry and equipment in their segments, and now focus their combined prowess to become a single source for the critical tools governments and agencies need for modern combat and policing.

CENTURIES OF EXPERTISE, FOCUSED ON SOLUTIONS.

BDT strives to fully understand customer needs, then focuses 750 years of experience, effective innovation, and world-wide engineering, manufacturing and distribution capabilities to deliver weapon solutions that unify operators, firearms, optics, ammunition, enablers, and support equipment. Supremely capable, customer-specific products, designed within a unified system, give operators the confidence to hit any target, control any situation, and accomplish any mission.

EXCELLENCE POWERED BY INDUSTRY.

Each BDT brand represents its own center of excellence, continually investing in expert personnel, specialized training, research and development, and cutting-edge technology and equipment. Over 1200 dedicated people are employed in BDT manufacturing alone, and thousands of working hours are dedicated each year to enhance product quality, production efficiency, work safety, and the environment.

WEAPON-BASED ANSWERS TO WORLD-WIDE ISSUES.

Law enforcement agencies around the globe are adopting technologies that monitor events in the field and communicate critical information to other departments. The i-PROTECT project is an integrated system that incorporates these

capabilities, enhancing safety and reducing response times. Now being tested, i-PROTECT is designed by Beretta in cooperation with the University of Brescia and Intellitronika, a specialist in computer systems and communications.

ARX INTELLIGENT RAIL™

A soldier's primary weapon system may require multiple or nonstandard battery types, multiple switches and controls, numerous spare batteries, and external cables, resulting in heavy, unbalanced weapons. The rugged, Intelligent Rail can power and activate attached accessories directly from a centralized battery pack and control panel, simplifying operations, standardizing battery type, eliminating redundancy and reducing weight. Additionally, the Rail can transfer data, including digital imagery, between the mounted accessories. With less weight, simpler operation and fewer batteries to haul, combatants can be more mobile, effective and self-sustaining, for greater mission success.

TESTED, PROVEN, TRUSTED.

Since 1526, elite warriors have trusted their missions, and their lives, to Beretta weapons. As the world’s oldest and largest manufacturer of small arms, Beretta’s unmatched battle experience and weaponry skills give modern soldiers and police officers the capability and confidence to do what duty demands, in any situation.

BERETTA FIREARMS empower armed forces, elite units and law enforcement agencies in over 100 countries. Sidearms like the 92FS pistol and PX4 Storm are standard issue for their dependable accuracy and impact. The Beretta ARX160 automatic rifle platform and GLX160 grenade launcher redefine assault-weapon performance. The Mx4 Storm submachine gun and Cx4 Carbine bring advanced materials and ergonomics to the field. Beretta offers the world’s widest range of small firearms from the industry’s most advanced facilities, bringing a decisive edge to your side.

RESPECTED EVERYWHERE.

As a preferred combat weapon for military and police forces around the world, Benelli tactical shotguns have served in nearly every major conflict in the last 10 years. Benelli military milestones include the respected M4, M3 and Nova, revolutionary A.R.G.O. (Auto Regulating Gas Operated) system, and the renowned Inertia Driven® system featured in the semi-automatic M2 and dual-action M3. Benelli technology, reliability and global battle-proven performance are simply second to none.

BENELLI earned the U.S. Marine Corps contract for M4 tactical shotguns in 1998. Since then, Benelli has become the official service shotgun of U.N. Blue Helmet troops as well, serving in conflicts, disaster areas and war zones around the world. The ultra-reliable A.R.G.O. system is featured in the entire M4 family, and in the versatile MR1 combat carbine used by military, law enforcement and patrol forces worldwide.

PRECISION BEYOND EXPECTATION.

The absolutely critical nature of sniper operations makes producing its rifle and ammunition a solemn obligation. Sako has excelled at this responsibility since 1921. Sako's unique history of highly skilled gunsmithing, forward-thinking tools and techniques, and obsessive attention to detail creates ruggedized weapons and cartridges of exceptional precision, consistent repeatability, and life-changing accuracy.

sako

SAKO is recognized by world-class marksmen as the ultimate precision sniper system. The design, manufacture, refinement and perfection of finely-tuned rifles, match-grade ammunition, and specialized accessories ensures optimum performance from each component. Decades of specializing in challenging targets, vital ergonomics and extreme conditions ensures maximum functionality. The result is greater success, whatever the situation.

**CONFIDENCE.
LEADERSHIP. VICTORY.
ALL BEGIN WITH VISION.**

Around the world, armed forces turn to Steiner for the critical tools of modern combat. Steiner’s specialized German facility is the world market leader in military binoculars, scopes, sights and laser range finders. Steiner’s U.S. eOptics division produces battle-proven lasers, beacons, and night vision systems. Conceived, designed and manufactured by Steiner, these tools have no equal on the battlefield - one reason why Steiner M22 binoculars have served the U.S. military for 30 years, and Steiner’s M5Xi riflescope has been adopted by the German Special Forces.

STEINER

STEINER OPTICS has advanced its “any condition, any lighting” objective through its cutting-edge eOptics Division. All eOptics products are manufactured in the USA, including battle-proven small arms visible and infrared laser aiming, illumination technology, night vision, thermal imaging and combat identification systems. The PVS/21 low profile night vision goggles and the AN/PEQ-15A dual beam aiming laser device are deployed by special forces and elite units facing challenges around the world.
