

ORACLE

by *Burris*

Rangefinding Bow Sight provides
Exact Distance
to target and
Exact Aiming Point

Burris
FIND WHAT MATTERS

THE ORACLE ADVANTAGE

Rangefinding bow sight instantly provides exact distance to target and exact aiming point.

Eliminates guessing distance.

Built-in rangefinder gives exact distance to the target at full draw.

Eliminates aiming between pins.

Instantly calculates and displays the exact aiming point for any distance and shot angle.

Eliminates aiming with the wrong pin.

The Oracle presents the one and only perfect aiming dot for the exact distance and your exact arrow.

SPECIFICATIONS

Weight	17 oz.
Battery	CR123
Battery Life.....	1000 - 2000 activations
Laser to Reflective Target	500 yds
Laser to Deer	200 yds
Operating Temperature.....	-10F to 140F
Storage Temperature	-40F to 158F

HOW IT WORKS

- 1 Just sight in at 20 yards and two farther distances and the Oracle learns your entire trajectory curve.
- 2 A rangefinder measures the exact distance to your target while at full draw.
- 3 The Oracle instantly calculates the perfect trajectory compensation for the distance and shot angle.
- 4 The sight displays exact aiming point for your shot.

Easy push-button activation

THE ORACLE DISTINCTION

Combining Proven Riflescope Technology with Archery Experience and Passion
Burris is the undisputed leader in automatic trajectory compensation sights with its Eliminator laser rangefinding riflescope. This advanced technology is combined with over 100 years of internal archery experience to bring this cutting edge bow sight to the market.

Locking Micro Adjustment Knobs
Sighting in the Oracle is fast and precise with micro adjustment knobs that lock down rock solid.

No Glass to Glare, Scratch or Fog
Rain, fog, dust, mud...all in a day's hunt. Nothing will slow you down. Don't let your shot of a lifetime walk away because you couldn't see clearly through your sight.

20-Yard Fixed Pin
Oracle is the ultimate in reliability. We still built in a fixed 20-yard pin to give you supreme confidence that you will always have a pin to reference, no matter what.

Rear Peep Improves Shot Accuracy and Consistency
Eliminates bow grip torque and the need for a string peep sight. Also improves visibility in low light.

Burris Forever Warranty
We will replace or repair your bow sight if it is damaged or defective. The warranty is automatically transferred to future owners. No repair or replacement charge, no warranty card needed, no receipt needed and no questions asked. We even cover the electronics. Try to find that level of customer commitment anywhere in the industry.
