PLUS**

BUILT TO GO WHEREVER YOUR HUNT TAKES YOU

The new A400 Xtreme Plus is designed to withstand the toughest waterfowl environments and is engineered to be the softest-shooting, most reliable, 3½" waterfowl shotgun out there.

Beretta is the world leader in barrel technology used at the highest levels of competition. The A400 Xtreme Plus is the first field-grade shotgun to utilize Beretta's patented Steelium Plus barrel technology. By lengthening the forcing cone on the Steelium Plus barrels, the transition from chamber to bore diameter is extended with a gradual taper to increase patterning performance and reduce felt recoil. The extended, 14" forcing cone keeps shot patterns consistently accurate while minimizing recoil and muzzle rise. Own the field and dominate the flyways with the A400 Xtreme Plus.

Traditional barrels

Traditional barrels are built with shorter forcing cones with an aggressively sharp constriction angle. This causes shot loads to compress abruptly. This causes the pellets within the shot load to deform and adversely affects the uniformity and pattern of the shot, meaning less of the shot load actually makes it on target. The longer forcing cones of the A400 Xtreme Plus, with Steelium Plus Barrels puts more pellets on target with less felt recoil.

36% faster than any other shotgun.

The innovative Beretta gas operating system is 36% faster than any other operating system. Featuring a rotating bolt, new feeding system and a self-cleaning piston, the A400 Xtreme Plus possesses unmatched reliability, speed and performance.

Steelium is the production technology of the Beretta barrels that transforms the special tri-alloy steel, into an exceptional barrel, due to a manufacturing process that is unique. Thanks to the deep drilling, cold-hammer forging, and to the special vacuum distension, the steel acquires the ideal characteristics to offer the best ballistic performance available today.

Shot pattern remains perfect and uniform in every type of hunting situation.

Optima-Bore® HP geometry was conceived to offer the best ballistic performance available even with steel shot. The shot pattern remains perfectly uniform whatever the shell size or load. Optima-Bore HP choke tubes further enhance the effect.

A further step forward in performance. Soft, light and able to slide during shouldering.

Micro-Core is an innovative recoil pad developed by Beretta, thanks to our experience gained over centuries on the competition and hunting fields around the world. The open cell techno-polymer is softer, lighter and slides better than rubber. Micro-Core expands, increasing its surface area on the shoulder and giving the shotgun secure and precise support.

KICK-OFF³
The only device in the world that eliminates the second recoil peak.

Precise laboratory testing clearly demonstrated that recoil has two very distinct components: the explosion of the ammunition at the moment of firing (1st peak) and the impact of the bolt against the receiver at the end of its travel (2nd peak). Kick-Off³ is a third hydraulic dampener that targets the 2nd recoil peak. In doing this, even the stress on the mechanical components is notably reduced, increasing the service life of the gun.

THE BEST RECOIL REDUCTION SYSTEM IN THE WORLD WITH 70% LESS FELT RECOIL

The world's most advanced recoil reduction, now MEGA! Kick-Off and Kick-Off³ have revolutionized the world of recoil reduction, reducing felt recoil by up to 70%, giving hunters the maximum of comfort and control together. With Kick-Off MEGA, the gun recoils parallel to the cheek mount. These combined systems result in a substantial reduction in muzzle rise and less recoil, allowing for better follow-up shot control.

The new Kick-Off MEGA reduces recoil 70% more than any other shotgun of it's kind on the market and provides Xtreme comfort because the stock area that makes contact with the face remains stationary. Kick-Off³ and Kick-Off MEGA are integral to the design of Beretta's A400 Xtreme Plus and comes standard on all models.

*Kick-Off MEGA & Kick-Off³ is standard on all A400 Xtreme Plus models.

A400 Xtreme PLUS

The versatility to shoot 2¼" to 3½" loads through a gun with the weight, balance and barrel previously found only on a high-performance competition shotgun.

Soft Comb Cheek Piece

- Soft rubber, non-slip
- Reduces felt recoil
- Reduces cheek movement
- Increased comfort in the cold

Drilled & Tapped

- To receive picatinny rail

Stepped Rib

- 7mm x 7mm wide rib
- Raises rib to eye level

Steel Mid-Bead

Fiber Optic Front Sight

Expanded/Beveled Loading Port

- Reduces thumb bite
- Easier loading with gloves
- High visibility green follower

Extended Black Edition Chokes

- Five chokes included
- No wrench required

Enhanced Controls

- Extended charging handle
- Enlarged bolt release
- Oversized safety

AQUA
TECHNOLOGY

Superior corrosion protection.

Aqua Technology provides corrosion resistance to ensure all internal and external metallic components remain impervious to every extreme element you may encounter.

A400 Xtreme PLUS

GAUGE	12
CHAMBER	2¾" + 3" + 3½"
FUNCTIONING SYSTEM	Semi-automatic shotgun featuring the new Beretta gas operated "Blink" system
LOCKING SYSTEM	Rotating bolt with reinforced lugs
RECEIVER	Aluminum-alloyed receiver (lightweight and strong)
FINISHING	Black Synthetic, Real Tree Max-5, True Timber DRT, Mossy Oak Bottomland, Gore Optifade Timber, Gore Optifade Marsh
BARREL	Steelium Plus barrels with a 14" forcing cone
BARREL LENGTHS	26" – 28"
CHOKES	Optima Choke HP Black Extended – Full, Improved Modified, Modified, Improved Cylinder, Cylinder
RIB	7mm x 7mm stepped ventilated rib
TRIGGER	Chrome plated
TRIGGER GUARD	Oversized
SAFETY	Reversible, oversized safety button with new ergonomics for better operation
FRONT SIGHT	Fiber optic front sight with steel mid bead
STOCK	Synthetic pistol grip stock with cheek piece (Adjustable shim system.)
GRIPS	Non-slip rubber grips
RECOIL PAD	New Micro-Core pad
ACCESSORIES	New dedicated case with stock drop spacers, Beretta oil, quick detachable swivels and 3 chokes with wrench
WEIGHT	7.8 Lbs (12 ga.)
