

966 SAGUARO GTX RR 0966PM0G

PURPOSE

The hunting boots 966 SAGUARO GTX RR are particularly suitable for wild boar or big game hunting. This kind of hunting involves extensive hikes in a wide range of terrains, from forested hills to harsh rocky mountains and tundra, both in cold and humid conditions. The GORE-TEX lining keeps the feet dry for long hours, while the Hydrobloc® Nubuck high-cut leather upper with PU reinforcements provides stability and additional protection to calf and ankle in the bush and with cold weather conditions. The protective toe rand and the PU reinforcements protect the leg from scratches and cut. Zamberlan® chose the Zamberlan® Vibram® StarTrek II sole with a TPU stabilizer to enhance stability, a PU wedge for shock absorption and cushioning, and a wide toe and heel contact area for better grip. The Star Trek II sole has multi directional deep lugs to enhance traction and toe-off. 966 SAGUARO GTX RR is handcrafted in Italy with the finest materials.

Col. Brown/ Cod. MO

BENEFITS

- ✓ PU reinforcements on ankle area to provide additional protection
- ✓ GORE-TEX lining keeps your feet dry
- ✓ Protective rubber rand reinforcement
- ✓ TPU stabilizer on the heel zone
