AFFINITY CATALYST

The Ultimate Auto-Loader for Ladies

AFFINITY CATALYST– 12-GA, 3"
ITEM # 40872 A-Grade Satin Walnut

Take the popular Affinity, optimize it for women's physical structure and you get the Affinity Catalyst. No, it is not a renamed youth model, as is true with other brands; it is the result of a scientific study aimed to deliver professional-level performance for women. The heart of the concept is the stock—drop, cast, pitch and length of pull. As women's cheek-bones sit higher than men's, the comb is raised to achieve eye-alignment with no need to lift the head. Also, the special cast makes it easy to shoulder. In all, the Affinity Catalyst will give women the feel and function that serious shooters expect of their semiauto.

Momentum

Superior Ergonomics and Feel, Italian Tradition

MOMENTUM RIFLE
Black synthetic, Bolt-action (shown with optional 2-piece Burris scope base – not included)

The stock of the Momentum is truly revolutionary. It combines raised curves and crisp checkering to offer the most ergonomic feel and positive hold in 5 frequently-used shooting positions. Most uniquely, the raised curves enable your supporting hand not only to grip the stock steadily, but also to exert forward or backward pressure if needed.

The feature-rich Momentum makes its debut in 4 popular hunting calibers.

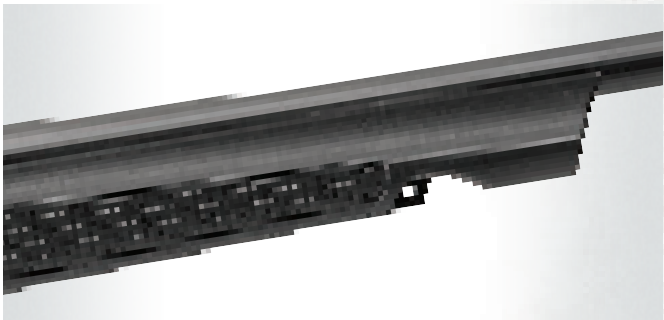

The one-piece bolt is spiral fluted and features 3 large-sized locking lugs for a rock-solid lockup—which translates into accuracy and reliability. The bolt is easily disassembled and has a short, 60-degree throw.

The cold-hammer-forged, chrome-molybdenum, matte-finish barrel is entirely free-floating for maximum accuracy. The end is threaded under a knurled cover, making it easy to attach a variety of muzzle accessories (5/8 x 24 thread).

The proven TSA recoil pad absorbs 50% of felt recoil and will not snag on your clothes as you shoulder the rifle. Also, a checkered recess at the rear of the stock will comfortably accommodate your left hand as you shoot from a bench.

How many times has a conventional swivel-stud hit your left hand under recoil? “Feels right” also means getting rid of this annoying problem—in this case by designing the stock so that the swivel attachments do not protrude.

The next development was in the direction of gas-operated semi-autos, and the current modernization trend includes the incorporation of the Inertia Driven® system to drive the latest generation of Franchi semi-automatic shotguns. The Franchi semi-autos remain the choice of many discerning wing shooters for their lightning-fast handling qualities and superior “feel.”

Franchi shotguns are quality firearms that meet today’s demanding standards without compromising the original ideas and concepts that make Franchi firearms unique. Combining cutting-edge modern manufacturing methods and technology with Old-World gun craftsmanship, has enabled Franchi to create sets of shotguns that are amazingly simple, yet absolutely reliable. With modern metallurgy and technology and their distinct lightweight styling, Franchi’s 48 AL, Instinct over & unders and the Inertia Driven® Affinity are testament to that fact.
